

Recognized
by those
who
understand
surgical
precision.

Needles and sutures carefully developed for
high performance and predictability in soft tissue
management surgeries in **Perio and Implant dentistry**.

NYLON SOFT BLUE

Blue Polyamide Ultra Soft | Monofilament | Non Absorbable

Code	Suture Information		Needle Information (All reverse cutting)		
	USP	Lenght	Circle	Diameter	Lenght
NSB40.17.38T-BR	4-0	22"(55cm)	3/8	Black Regular	17mm
NSB50.15.12T-BR	5-0	22"(55cm)	1/2	Black Regular	15mm
NSB50.15.38T-BR	5-0	22"(55cm)	3/8	Black Regular	15mm
NSB50.15.38T-R	5-0	22"(55cm)	3/8	Regular	15mm
NSB50.17.38T-BR	5-0	22"(55cm)	3/8	Black Regular	17mm
NSB50.17.38T-R	5-0	22"(55cm)	3/8	Regular	17mm
NSB50.13.38T-BN	5-0	22"(55cm)	3/8	Black Narrow	13mm
NSB50.15.38T-BN	5-0	22"(55cm)	3/8	Black Narrow	15mm
Features: Extra Soft Blue Polyamide not absorbable, high biocompatibility, high elasticity and medium tenacity.					
Indication: Any surgical procedure in Dentistry, especially procedures that require suture elasticity, easy of handling and comfort for the patient after surgery.					

PGCL

Violet Poliglecaprone 25 | Monofilament | Absorbable

Code	Suture Information		Needle Information (All reverse cutting)		
	USP	Lenght	Circle	Diameter	Lenght
PGCL40.17.38T-BR	4-0	27"(70cm)	3/8	Black Regular	17mm
PGCL40.17.38T-R	4-0	27"(70cm)	3/8	Regular	17mm
PGCL40.20.38T-BR	4-0	27"(70cm)	3/8	Black Regular	20mm
PGCL50.15.12T-BR	5-0	22"(55cm)	1/2	Black Regular	15mm
PGCL50.15.38T-BR	5-0	22"(55cm)	3/8	Black Regular	15mm
PGCL50.17.38T-R	5-0	22"(55cm)	3/8	Regular	17mm
PGCL60.15.38T-BN	6-0	22"(55cm)	3/8	Black Narrow	15mm
Features: Poliglecaprone is a synthetic monofilament in violet color with an average hydrolysis time of 90 days.					
Indication: Dentistry surgical procedures with indication of absorbable sutures, especially soft tissue management as it is a monofilament.					

NYLON BLUE

Blue Polyamide | Monofilament | Non Absorbable

Code	Suture Information		Needle Information (All reverse cutting)		
	USP	Lenght	Circle	Diameter	Lenght
NB60.15.38T-BR	6-0	22"(55cm)	3/8	Black Regular	15mm
NB60.13.38T-BN	6-0	22"(55cm)	3/8	Black Narrow	13mm
NB60.15.38T-BN	6-0	22"(55cm)	3/8	Black Narrow	15mm
Features: Blue Premium Polyamide not absorbable, high biocompatibility, high tenacity and medium elasticity.					
Indication: Any surgical procedure in Dentistry, especially procedures that require the suture to combine tenacity, elasticity and delicacy.					

PGA

Violet Polyglycolic Acid | Multifilament | Absorbable

Code	Suture Information		Needle Information (All reverse cutting)		
	USP	Lenght	Circle	Diameter	Lenght
PGA40.17.38T-BR	4-0	27"(70cm)	3/8	Black Regular	17mm
PGA40.20.38T-BR	4-0	27"(70cm)	3/8	Black Regular	20mm
PGA50.15.38T-BR	5-0	22"(55cm)	3/8	Black Regular	15mm
Features: Polyglycolic Acid in violet color, absorbable, multifilament, with surface treatment, hydrophobic qualities, and hydrolyzes in approximately 90 days.					
Indication: Dentistry surgical procedures with indication of absorbable sutures, preferably internal sutures.					

POLYPROPYLENE

Blue Polypropylene | Monofilament | Non Absorbable

Code	Suture Information		Needle Information (All reverse cutting)		
	USP	Lenght	Circle	Diameter	Lenght
PP50.15.38T-BR	5-0	22"(55cm)	3/8	Black Regular	15mm
PP60.15.38T-BR	6-0	22"(55cm)	3/8	Black Regular	15mm
Features: Non-absorbable Blue Polypropylene, does not undergo hydrolysis, high biocompatibility, medium elasticity and medium tenacity.					
Indication: Any surgical procedure in Dentistry, most used in Facial Harmonization as it does not undergo hydrolysis and maintain tension.					

NEEDLE SPECIFICATIONS

NEEDLE DIAMETERS

Narrow	Regular
Narrow needles 0.33mm	Regular needles 0.43mm

NEEDLE CURVATURES

3/8 CIRCLE	1/2 CIRCLE
Lengths for 3/8 circle needles: 11, 13, 15, 17 and 20mm	Lengths for 1/2 circle needles: 15mm
